

StrapBandit - Pallet Threading Tool

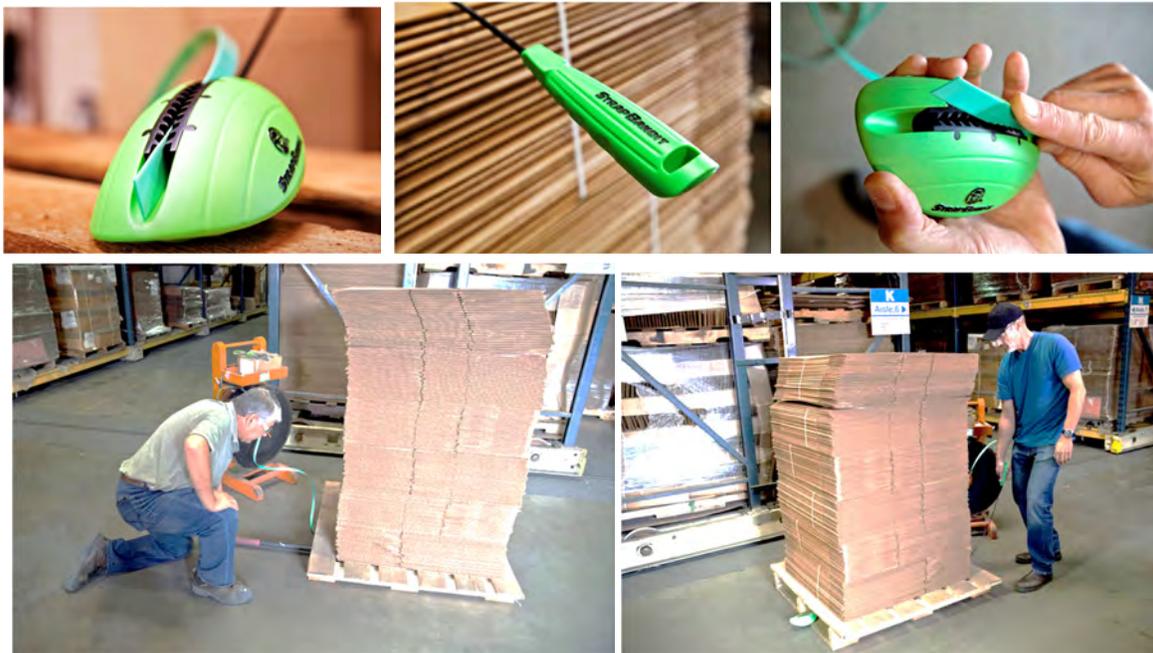

Designed to simplify the pallet strapping process while improving efficiency and allowing the worker to stay in a more natural and upright position.

Description

Length: 71" Head Width: 3.25" Head Height: 1.94" Weight: 7.5 oz.

StrapBandit is designed to make the threading process fast, efficient and safe. The durable head threads all common pallets and crates without getting stuck. Its unidirectional cleat easily and securely holds the strap. The device is capable of delivering nearly all plastic and corded strapping, and its composite rod easily flexes to slip strapping through a 48" pallet, without having the worker bend over, even in spaces as tight as 12 inches. The StrapBandit can handle hundred straps in about 9 minutes.

Old way

With StrapBandit

- The fastest and safest way to thread pallets
- Easily and securely holds plastic & corded strapping
- Can be used even in tight spaces
- Doesn't get stuck on boards
- Rugged Industrial Design
- Use from a comfortable upright position
